VOLUME CONTENTS

VOLUME 55 1991 NUMBER 1

A. B. AMINOV and T. K. SIRAZETDINOV: Sign-definiteness conditions for complex functions and the stability of the motion of non-linear systems 1
V. V. KOZLOV: On the stability of equilibrium positions in non-stationary force fields 8
D. M. KLIMOV, A. P. MARKEYEV and O. V. KHOLOSTOVA: On the stability of the motion of a viscoelastic ring in a gravitational field 14
S. V. ZUBAREV: Slipping regimes in mechanical systems 19
I. I. KOSENKO: The use of Chebyshev polynomials to construct perturbed-motion trajectories in non-linear mechanics 24
G. N. MIL'SHTEIN and O. E. SOLOV'YEVA: Recurrent estimation and identification of the parameters in non-linear deterministic systems 29
B. N. SOKOLOV: Stabilization of dynamical systems with geometrically constrained control 37
A. A. MELIKYAN and N. V. OVAKIMYAN: Singular trajectory in the problem of simple pursuit on a manifold 42
P. V. PROKOPOVICH and A. A. CHIKRII: Quasilinear conflict-controlled processes with non-fixed time 48
KH. G. GUSEINOV and V. N. USHAKOV: Differential properties of integral funnels and stable bridges 56
V. A. BATYSHCHEV: The non-linear action of tangential stresses on the wave motion of a low-viscosity fluid 61
I. S. MEN'SHOV: The generalized problem of breakup of an arbitrary discontinuity 67
A. I. RYLOV: On the possible modes of flow round tapered bodies of finite thickness at arbitrary supersonic velocities of the approach stream 74
YU. N. GORDEYEV: Non-stationary problem of a plane hydraulic fault crack in a fluid-saturated stratum 78
V. I. KONDAUROV: On the rheological instability of an elastic damaging medium 85
V. YA. TERESHCHENKO: Dual formulations of the boundary-elements method. Application to elasticity theory problems for inhomogeneous bodies 93
R. V. GOL'DSHTEIN and YU. V. ZHITNIKOV: Mixed spatial problems of elasticity theory with a circular line separating the boundary conditions 100
F. M. BORODICH: Integral characteristics of solutions of spatial problems on the dynamical impression of solid bodies in continuous media 106
V. M. ALEKSANDROV and D. A. POZHARSKII: On contact problems for wedge-shaped plates 114
G. YA. POPOV: On a novel approach to the problem of the concentration of elastic stresses near a crack 120
S. A. NAZAROV and O. R. POLYAKOVA: Fracture of a narrow bridge between cracks lying in the same plane 128
S. A. AGAFONOV, K. B. ALEKSEYEV and N. V. NIKOLAYEV: Stability of the control of a plane turn of a spacecraft 136
R. N. BAKHTIZIN and R. K. MUKHAMEDSHIN: Invariant solutions of the equation of non-steady laminar flow of a non-Newtonian fluid in pipes 139
A. G. GORSHKOV, D. V. TARLAKOVSKII and A. M. SHUKUROV: The propagation of waves from a spherical cavity in an acoustic half-space 142
Contents of next issue I

VOLUME 55 1991 NUMBER 2

L. L. AKULENKO: Quasistationary finite-interval control of the motion of hybrid oscillatory systems 145
V. V. BELETSKII and M. D. GOLUBITSKAYA: Stabilization and extremal properties of resonant modes of bipedal locomotion 153

J. M. SELIG: Applying screw theory to robot dynamics ... 159
A. M. TARAS'YEV: Programmed constructions in control problems with vector criterion ... 168
P. YA. POLUBARINOVA-KOCHINA: Accessory parameters in circular quadrangles ... 176
V. F. PIVEN: The method of axisymmetric generalized analytical functions in the analysis of dynamic processes ... 181
A. G. PETROV and A. N. CHUVASHOV: On finite amplitude waves at the boundary of separation of two flows of a heavy ideal incompressible fluid ... 187
A. V. MARCHENKO and I. V. PROKHOROV: Linear waves in a fluid flow with constant vorticity located under an ice blanket ... 193
P. V. TRET'YAKOV: Integral solutions of the wave equation and the diffraction of an arbitrary acoustic wave by a wedge ... 201
N. A. GUMEROV: Weakly linear oscillations of the radius of a vapour bubble in an acoustic field ... 205
V. A. BUZHINSKII and I. M. MEL'NIKOVA: Determination of the drag on oscillating plates in a fluid ... 211
E. V. TEODOROVICH: Turbulent diffusion of a passive impurity ... 220
N. L. VASIL'YEVA, G. L. SEDOVA and L. T. CHERNYI: A cylindrical probe in an electrohydrodynamic flow, non-collinear with the electric field vector ... 227
O. A. GIL'MAN and N. N. PILYUGIN: Pareto-optimal forms of axisymmetric bodies moving at high supersonic speeds ... 232
L. A. ALEKSEYEVA: Analogues of the Kirchhoff and Somigliana formulae in two-dimensional elastodynamic problems ... 238
V. YA. TERESHCHENKO: The problem of the justification of variational formulations of the boundary element method ... 248
A. V. STEPANOV: On forced oscillations of linear elastic systems with damping ... 255
V. A. EREMEYEV: Local stability of hydrostatic compression states of non-linearly thermo-visco-elastic bodies of differential type ... 259
O. YU. SHARII: Mode theory of electromechanical energy conversion in piezoelectric materials ... 266
A. R. KASIMOV: Optimization of irrigation in a hydrodynamic filtering model ... 273
S. D. KLYACHKO: The conditions for the solutions in electromagnetoelasticity to be equal to zero ... 276
A. N. TSVETKOV and M. I. CHEBAKOV: An efficient technique for solving a class of infinite systems in contact problems in the theory of elasticity ... 279
V. N. KUTRUNOV and L. E. MAL'TSEV: Spectral regularization of integral equations in the theory of elasticity ... 283
Contents of next issue ... 286

VOLUME 55 1991 NUMBER 3

G. G. CHERNYI: The motion of a plate in a melting solid medium ... 287
V. V. STRUMINSKII: Asymptotic methods of solving the system of kinetic equations of a gaseous mixture ... 298
V. I. GRYN: Exact solutions of the Navier–Stokes equations ... 301
A. N. KRAIKO: The front end of a given volume having optimum pressure drag in the approximation of Newton's law of resistance ... 310
V. A. BATYSHCHEV: Selfsimilar solutions describing thermal capillary flows in viscous layers ... 315
A. S. SAVIN: Hydrodynamic singularities in flows with a free boundary ... 321
A. N. BESTUZHEVA and A. A. DORFMAN: Wave motions caused by a source in a fluid of variable depth ... 325
S. I. SAFARGULOVA and N. N. SMIRNOV: On the rate of propagation of small perturbations in porous media ... 332
L. M. ZUBOV: Variational principles for non-linear elastostatics in Eulerian coordinates ... 338
A. A. PIMENOV and V. I. PUSHKAREV: The use of quaternions to generalize the Kolosov–Muskhelishvili method to three-dimensional problems of the theory of elasticity ... 343
K. A. CHISHKO: Spectral decomposition of Green's tensor of the dynamic problem of the theory of elasticity in cylindrical coordinates ... 348
N. N. ROGACHEVA: A linear theory of double-layer resin-metal shells ... 352
A. G. KOLPAKOV: Calculation of the characteristics of thin elastic rods with a periodic structure ... 358
A. YU. BELYAYEV: Optimization of the structure of composites ... 366

B. I. SMETANIN: On an integral equation for axially-symmetric problems in the case of an elastic body containing an inclusion 371
I. A. DUPLYAKIN: The motion of a carriage with constant velocity along a beam of infinite length resting on a base with two elastic characteristics 376
S. N. BESHENKOV and S. F. GORBAN: One-dimensional hydroelastic oscillations of three-layered plates 385
YU. D. KAPLUNOV: Slowly varying high-frequency stress–strain states in immersed shells 390
A. P. CHUGAINOVA: Stationary quasitransverse simple and shock waves in a weakly anisotropic non-linear elastic medium 396
V. V. SIL'VESTROV: Stress–strain states in a multisheet surface with cuts 401
S. A. NAZAROV: On three-dimensional effects near the vertex of a crack in a thin plate 407
A. V. KAPTSOV and E. I. SHIFRIN: The dynamics of an elliptical crack in an elastic space: solution using Padé approximations 416
R. N. BAKHTIZIN and R. K. MUKHAMEDSHIN: Invariant solutions of the equations of the non-isothermal stationary flow of a viscous fluid in tubes 423
K. P. BELYAYEV: Diffraction of shear waves by an elastic cylindrical inclusion with two cuts on the phase boundary 425
Contents of next issue I

VOLUME 55 1991 NUMBER 4

A. S. ANDREYEV: An investigation of partial asymptotic stability 429
K. PEIFFER: On inversion of the Lagrange–Dirichlet theorem 436
V. A. VUJIČIĆ and V. V. KOZLOV: Lyapunov stability with respect to given state functions 442
S. P. SOSNITSKII: The stability of equilibrium in conservative systems 446
V. N. RUBANOVSKII: Bifurcation and stability of the relative equilibria of a gyrostat satellite 450
P. CAPOĐANNO: Stability of a solid containing a fluid moving in a fluid 455
V. N. TKHAI: The reversibility of mechanical systems 461
B. S. BARDIN: Asymptotic solutions of Hamiltonian systems with first-order resonance 469
L. K. KUZ'MINA: Solution of the singularly perturbed stability problem 475
D. YU. POGORELOV: Iterative methods of investigating parametrically excited linear dynamic systems 481
A. S. KOVALEVA: The construction of successive approximations of the perturbation method for systems with random coefficients 489
O. V. MUZYCHUK: Application of continued matrix fractions to the analysis of stochastic systems with polynomial non-linearities 496
V. D. IRTEGOV: Submanifolds of invariant manifolds of stationary motions and their properties 501
A. YA FIDLIN: On averaging in systems with a variable number of degrees of freedom 507
A. M. KOVALEV: Oriented manifolds and the controllability of dynamical systems 511
E. V. SINITSYN: Evolution and resonances in the rotational motion of a viscoelastic planet in an elliptical orbit 517
S. A. NAZAROV: The spatial structure of the stress field in the neighbourhood of the corner point of a thin plate 523
YU. A. ANTIPOV and N. G. MOISEYEV: Exact solution of the plane problem for a composite plane with a cut across the boundary between two media 531
R. V. GOL'DSHTEIN, YU. V. ZHITNIKOV and T. M. MOROZOVA: Equilibrium of a system of cracks with contact and opening regions 539
I. P. PERLIN and A. Z. SHTERNSHIS: The determination of the stress intensity factor in a plane problem of the theory of elasticity 545
V. V. TVARDOVSKII: A pseudomacrocrack in an anisotropic body 549
MEI FENGXIANG: A method of integrating the equations of motion of non-holonomic systems with higher-order constraints 555
I. D. SAKHOKIYA and R. S. SULIKASHVILI: Triangular libration points and their stability in the restricted, circular, plane three-body problem 560
A. V. KARAPETYAN: Qualitative investigation of the dynamics of a top on a plane with friction 563
A. O. IGNAT'YEV: On the instability of an equilibrium point of a linear oscillator with variable parameters 566
Contents of next issue I

VOLUME 55 1991 NUMBER 5

V. N. TKHAI: The behaviour of an invertible mechanical system on the boundary of the stability region 569
V. V. KOZLOV and I. I. CHIGUR: The stability of periodic trajectories of a billiard ball in three dimensions 576
A. G. IVANOV: The almost periodic Lyapunov problem 581
V. B. KOLMANOVSKII and N. I. KOROLEVA: Control of a predator–prey system with intraspecies competition 588
V. P. MALYUKOV: A differential game of quality for two groups of objects 596
A. A. MELIKYAN and N. V. OVAKIMYAN: A simple pursuit-and-evasion game on a two-dimensional cone 607
A. V. PLOTNIKOV and L. I. PLOTNIKOVA: Two problems of encounter under conditions of uncertainty 618
A. S. BARANOV: Some simple forms of viscous oscillations of ellipsoidal equilibrium figures 626
A. F. SIDOROV: Shockless compression of a barotropic gas 637
A. L. RYLOV: On certain properties of a subsonic flow behind a shock wave arising during supersonic flow around bodies of finite thickness 649
K. P. GORSHENIN: The critical surfaces and other properties of "smooth" axisymmetric plasma flows in channels 657
B. A. MALOMED, V. S. MITLIN and V. N. NIKOLAYEVSKII: Shortwave bifurcation in a model of seismically active medium and dominant frequencies 665
I. M. AMETOV, I. SH. AKHATOV and V. A. BAIKOV: Stability of the displacement of immiscible visco-elastic liquids in a porous medium 673
N. A. OSTAPENKO: Penetration of a thin cyclically symmetric three-dimensional body into an elastic half-space 679
A. B. MOVCHAN and S. A. NAZAROV: The influence of small surface irregularities on the stress state of a body and the energy balance for a growing crack 691
V. A. KOSHNAREVA and YU. A. MEL'NIKOV: The detachment of an elastic strip containing absolutely rigid inclusions from a support 702
P. I. PERLIN: Asymptotic behaviour of the solutions of boundary value problems of potential theory and the theory of elasticity in the vicinity of conical points on the boundary 708
L. A. ALEKSEYEVA: Fundamental solutions in an elastic space in the case of moving loads 714
YU. A. ROSSIKHIN and M. V. SHITIKOVA: The ray method for investigating transient wave processes in a thin elastic anisotropic layer 724
I. YE. TROYANOVSKII, I. N. SHARDAKOV and N. A. SHEVELEV: The problem of the eigenvalues and modes of rotating deformable structures 733
B. N. SOKOLOV: Stabilization of holonomic controlled systems near a position of equilibrium 740
G. I. NAZAROV and A. A. PUCHKOV: The equilibrium of a parabolic–logarithmic shell of revolution 743
S. V. KUZNETSOV: Interaction of dislocations in an anisotropic medium 746
V. S. LENSKII: Rayleigh motions in an elastic half-space with a constrained boundary 750
V. E. SADYKHOV: Approximate formulas for the stress intensity factors at the tip of a crack under longitudinal shear stress 753
Contents of next issue I

VOLUME 55 1991 NUMBER 6

F. L. CHERNOUS'KO: Control synthesis for a system with non-linear resistance 759
N. K. MOSHCHUK and I. N. SINITSYN: Stationary and stationarizable regimes in normal stochastic differential systems 771
A. L. KUNITSYN and M. V. MATVEYEV: The stability of a class of reversible systems 780
O. S. RYZHOV and YE. D. TERENT'EV: Wave motions in a spatial boundary layer 789
M. A. BRUTYAN and P. L. KRAPIVSKII: Investigation of the stability of periodic flows of a viscous fluid 805
L. D. AKULENKO and S. V. NESTEROV: Vibrations of a cylinder in a concentric vessel filled with a two-layer fluid 812
N. I. YAVORSKII: The thermal wake of a streamlined body 819

O. YU. DINARIYEV: The structure of the perturbation front in transport processes with relaxation 828
M. D. KOVALENKO: Biorthogonal expansions in the first fundamental problem of elasticity theory 836
A. L. KALAMKAROV, B. A. KUDRYAVTSEV and V. Z. PARTON: New integral transforms in boundary-value problems for laminated composites with a periodic structure 844
I. A. PASHKOV and I. YE. TROYANOVSKII: The eigenmode expansion method for oscillations of an elastic body with internal and external friction 852
A. M. GOMILKO, V. T. GRINCHENKO and O. N. MARTYNENKO: Boundary resonance in a semi-infinite elastic rigidly fixed waveguide 863
P. F. KURCHANOV, A. D. MYSHKIS and A. M. FILIMONOV: Vibrations of rolling stock and a theorem of Kronecker 870
V. G. SUTYRIN: Models of elastic media with stress relaxation 877
YU. A. ANTIPOV and N. KH. ARUTYUNYAN: Contact problems of the theory of elasticity with friction and adhesion 887
A. V. MANZHIROV and V. A. CHERNYSH: The contact problem of the discrete fitting of an inhomogeneous viscoelastic ageing cylinder with a system of rigid collars 901
S. I. REPIN: Variational formulations for discontinuous displacement fields in problems of the deformation theory of plasticity without hardening 910
YU. M. KOLYANO✣, B. V. PROTSYUK and V. M. SINYUTA: The axisymmetric static problem of thermoelasticity for a multilayered cylinder 920
V. M. SADOVSKII: Hyperbolic variational inequalities in problems of the dynamics of elastoplastic bodies 927
S. G. ARTYSHEV: The motion of a particle in the non-stationary field of a logarithmic potential 936
V. N. GALKIN and YU. A. STEPANYANTS: On the existence of stationary solitary waves in a rotating fluid 939
V. A. POZDEYEV: The method of non-linear time transformation in boundary-value problems of potential theory with moving boundaries for the non-linear wave equation 944
V. S. KRUTIKOV: A solution of an inverse problem for the wave equation with non-linear conditions in domains with moving boundaries 948
V. I. MOSSAKOVSKI and YE. V. POSHIVALOVA: A non-axisymmetric contact problem in the case of a normal load applied outside the area of contact 953
Contents of next issue I
